

Project-Based Learning in a nutshell

Project-Based Learning is PARTICIPATION in an ONGOING PROCESS that is driven by a real-world CHALLENGE that is RELEVANT to the learners.

1

The Project-Based Learning process uncovers KNOWLEDGE and SKILLS that improves the learner's POTENTIAL for collaboration, clear communication, critical thinking, and creative innovation (all of which are key elements of the mindset of an entrepreneurial).

2

3

Project-Based Learning is MEANINGFUL to the learner and their context, offering a sense of PURPOSE, and connecting learners to something bigger than themselves, allows them to develop MASTERY having the satisfaction of getting better at something by taking small steps and learning from feedback, affirms their AGENCY and AUTONOMY, allowing them to question, offering them choice and freeing them to change their world. It is supported by relevant curriculum-based CONTENT and directed by meaningful FEEDBACK which offers an opportunity to risk failure and adapt performance.
